Dear Curate Design + Decor, Blue Startups

My name is Morgane and I am a current New Media Arts student at Kapi'olani Community College, pursuing a degree in Interface Design. I am more than very excited about your internship position and I am looking forward to learning and working with your team.

I am particularly passionate about arts, I love to create and I am very open minded. I think that arts and design is more than just art. I think it is a way to express yourself and communicate with people. You can transmit emotions and powerful messages through a simple piece of art. It has a unique way of having the ability to move a world's heart and mind and has a soft way of speaking to each and everyone without having the harsh sides that words can have.

Having the opportunity to integrate the Interface program, helped me develop knowledge and skills in various areas including typography, graphic design, motion graphics, UI/UX design, and front-end web development. I understand the importance of being attentive to the expectations and taking the needs of a business and customers seriously and with good care.

I believe and am aware that building a relationship with your clients is more than important and I am more than ready to help our clients with the best of my abilities and your guidance.

I believe that the skills and qualities acquired professionally and academically, combined with my design obsession and eagerness to grow would make me a positive
